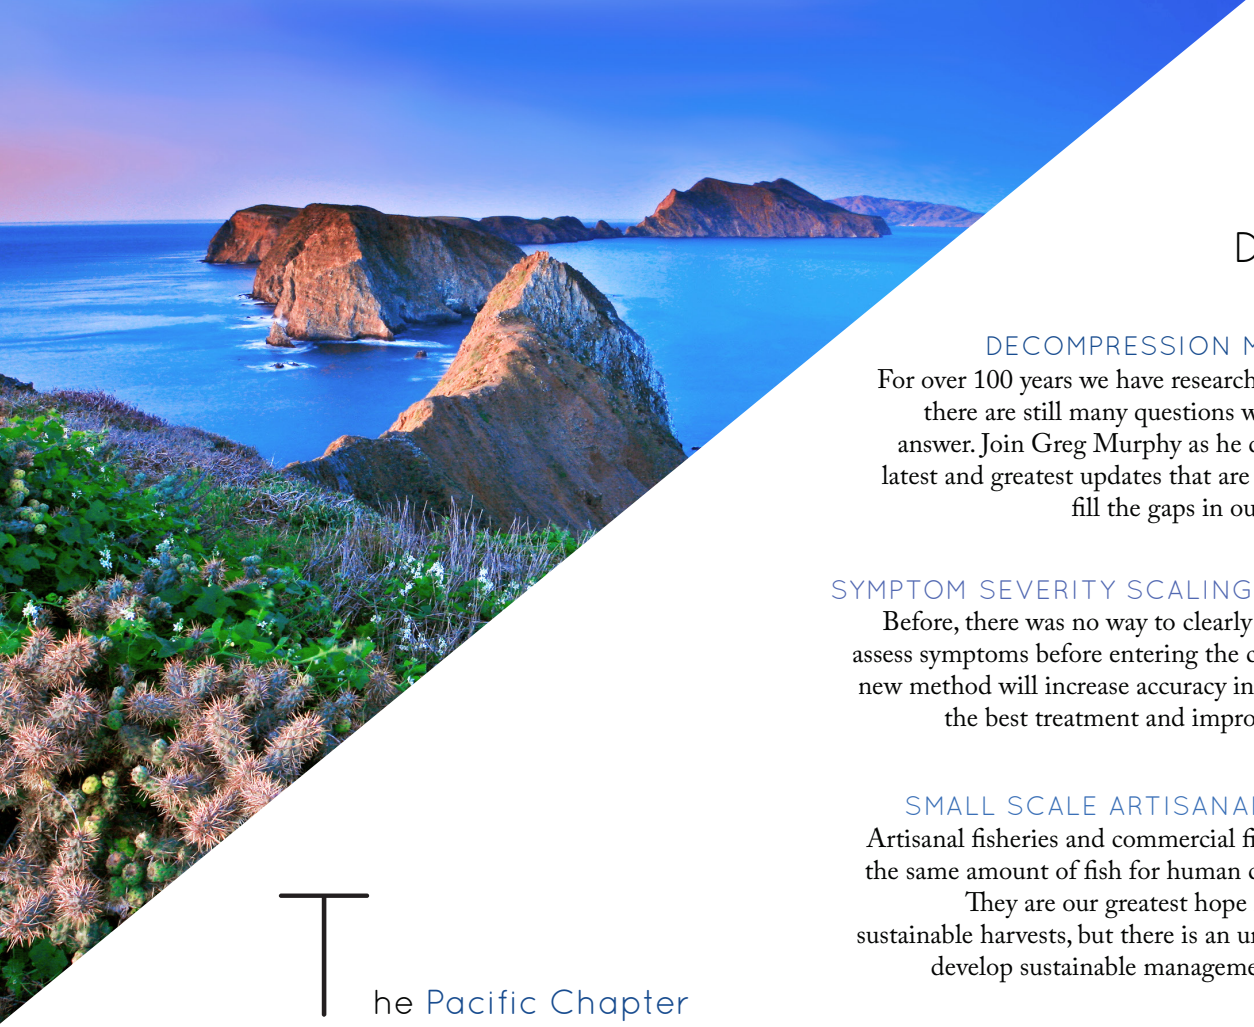
UNDERSEA & HYPERBARIC MEDICAL SOCIETY PACIFIC CHAPTER

SCIENTIFIC MEETING
2015



The Pacific Chapter Annual Scientific Meeting consists of two parts. The Friday Scientific Session seeks to present information and ideas promoting increased safety and medical care for the scuba diving community. The Saturday Conference centers on the clinical and medical applications of hyperbaric therapy for management of such problems as diving injuries, complicated wounds, disseminated infections and radiation injury.

NOV 13 & 14

DAY 1

DECOMPRESSION MODELING

For over 100 years we have researched DCS, but there are still many questions we have yet to answer. Join Greg Murphy as he dives into the latest and greatest updates that are beginning to fill the gaps in our knowledge.

SYMPTOM SEVERITY SCALING FOR DCS

Before, there was no way to clearly measure and assess symptoms before entering the chamber. This new method will increase accuracy in determining the best treatment and improve outcomes.

SMALL SCALE ARTISANAL FISHING

Artisanal fisheries and commercial fisheries catch the same amount of fish for human consumption. They are our greatest hope for achieving sustainable harvests, but there is an urgent need to develop sustainable management strategies.

DECOMPRESSION STRESS IN ON-GASSING MODELS FOR ARTISANAL FISHERMEN

One study. Four years. Two thousand five hundred dives.

ALTITUDE DECOMPRESSION SICKNESS

New concepts revealed - plus, possible predictors of long term neurological changes for U2 pilots.

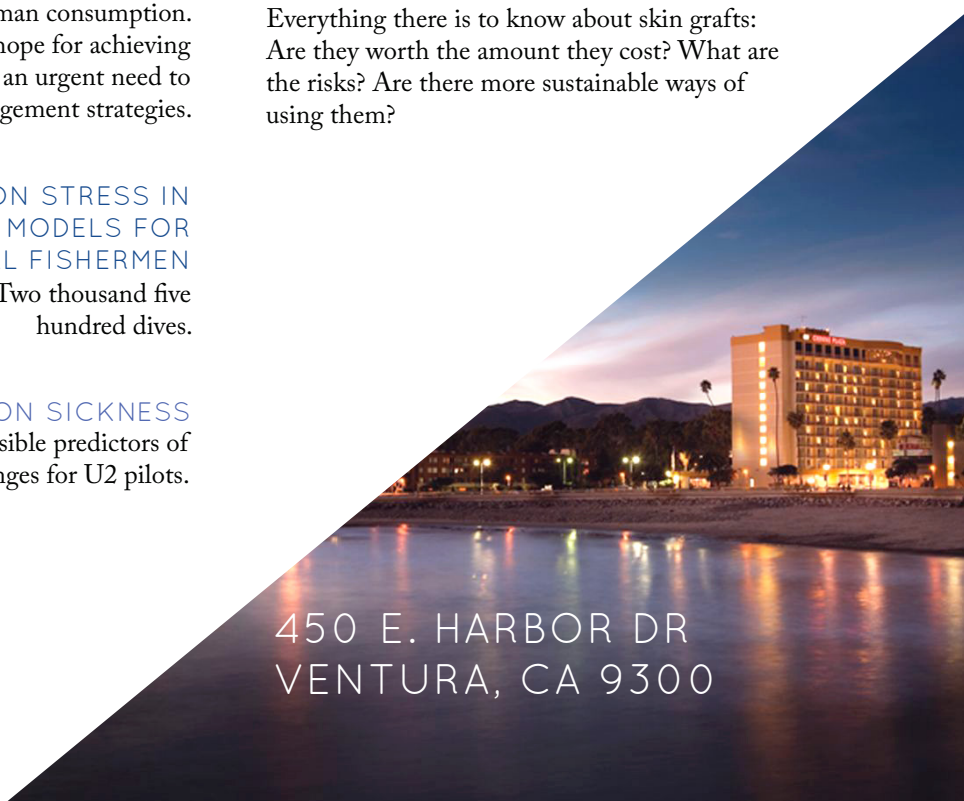
DAY 2

ARTERIAL GAS EMBOLISMS

New findings and solutions will allow us to treat iatrogenic gas embolisms more appropriately and improve patient outcomes.

SOFT TISSUE RADIATION INJURY IN THE LOWER EXTREMITY

Sometimes hyperbaric oxygen therapy is not the answer; learn how you can avoid this mistake with just basic assessments.

SKIN GRAFTS: HISTORY, EVIDENCE, GAPS, FUTURE


Everything there is to know about skin grafts: Are they worth the amount they cost? What are the risks? Are there more sustainable ways of using them?
