

# **MULTICENTER REGISTRY for HYPERBARIC OXYGEN THERAPY**

## **Procedure for Addition or Revision of Variables to the Core Dataset**

PURPOSE: To describe the procedure to add or revise variables to the core data set.

SCOPE: All members

### **DEFINITIONS:**

Core data set – the measures in the registry completed at all centers as part of registry operations (i.e. excludes measures unique to particular centers).

### **PROCEDURE:**

The proposal to revise, add, or remove variables to the core data set shall be submitted to the Steering Committee Chair or Co-Chair. The proposal will describe the proposed change and include a short rationale for the change. By majority vote, the Steering Committee will determine if the requested change should be made to the core data set. If the change is accepted the Steering Committee will authorize the registry programmer to make the change.
